

Crooked and Round Lakes Committee Meeting with Water Security Agency on Saturday August 16th at 10:00 am

Agenda

1. Water Security Agency (WSA) Presentation
2. What has happened in the last 5 years that is different from previous years?
3. How many illegal trenching issues are you dealing with right now?
4. Infrastructure:
 - a) Is there any research into how we can add control structures to reduce flooding – between the RM of Grayson and the RM of McLeod (Pearl Creek) or in the Lower Qu'Appelle Basin between Katepwa and Crooked Lake;
 - b) Need to move the High River Water Monitor at the old Bridge at Hwy #47 to the new bridge to check the in-flow of water coming into Crooked Lake and place a High River Water Monitor at the bridge along the Hwy #605 at the Cowessess Bridge to monitor the outflow of water leaving Crooked Lake.
